

Track. Manage. Optimize.

Managing a workforce that spends most of its time on job sites can be a real challenge. Do you know whether your workers arrived at the job site on time today? How do you know their timesheets are accurate? When a worker is late or unable to work, how do you accommodate your customers so you don't lose out on potential business?

GPS TimeTrack is a robust software application that makes it easy for you to track, manage and optimize your workforce. Installed on GPS-enabled mobile devices, it allows managers to monitor workers and automate data collection for employees' daily activities. This leads to more visibility into the activities of your team, allowing you to reduce costs, increase productivity, and provide better service to your customers.

With Xora GPS TimeTrack, your business will:

- Gain visibility into the locations and activities of your employees
 - Know where workers are and when they arrived
 - Know how long each worker spent at a job site
 - Enforce employee accountability
- Increase the productivity of mobile workers and office staff
 - Reduce the amount of paperwork to be processed by office staff
 - Collect job related information through mobile forms
 - Make better scheduling decisions
- Reduce labor, fuel and overtime costs
 - Validate mileage reported for reimbursement
 - Monitor hours worked for each employee in real time
 - Turn your employees' phones into location-aware time clocks
- Differentiate your service from your competitors
 - Provide better customer service
 - Process payments faster
 - Know when workers are running late or unavailable for a shift

How TimeTrack works

Workers carry GPS-enabled mobile phones or have vehicle-installed devices. Workers can enter time card and job data directly into their handsets.

Managers view workers' locations, time card information and job data on a secure Web portal. Job instructions and messages can be pushed back to workers from the portal.

Xora makes it easy.

Gain visibility. Reduce costs. Increase productivity. With a real-time view into where your workers are and how they are spending their time, you can be more proactive in managing your team and responding to customers. Collecting time card data and exchanging customer information is seamless, with no paperwork to collect or reenter into your back-end system. Your team will be more efficient and get more done each day.

▼ Gain visibility

Streamline communication

Constantly calling or paging workers to find out where they are is time-consuming and inefficient.

Xora uses GPS information gathered from your workers' mobile phones to provide accurate location information for your team. In just a few mouse clicks, you know where your workers are - in real time - by viewing their locations on the Xora Web portal.

Verify customer visits

Paperwork can get lost, arrive unreadable, or simply be inaccurate.

With error-free data capture, you can be sure that your employees arrived on site on time each day. GPS records provide real-time date, time, and location information for your mobile team so you are never out of sync.

▼ Reduce costs

Control vehicle costs

Speeding, driving out of route, or getting lost can burn excess fuel and result in unnecessary wear and tear to vehicles that ends up costing your company a bundle in reimbursement.

Xora helps you monitor the location and speed of your workers, ensuring that they are where they are supposed to be. If a worker speeds or travels out of route, you can be notified immediately, allowing you to manage your team proactively and control costs at the same time.

Manage overtime costs

Do you know how close your workers are to overtime right now? Overtime costs add up quickly, seriously impacting your bottom line.

With Xora, mobile phones become virtual time clocks, allowing you to keep track - in real time - of how many hours each employee works each week. Log in workers individually or by crew. You can even create alerts that notify you when an employee reaches a certain number of hours, so there are no surprises when you receive time sheets.

▼ Increase productivity

Improve job costing

Your workers have a lot of jobs to complete, but do you know how much time they are spending on each task?

Xora allows you to record job activity through mobile forms, helping you to understand the details of each job. You'll appreciate the ease of thorough record-keeping without the need to manually enter job records from illegible paperwork collected from job sites.

Automate scheduling

Schedules are never set in stone. Workers call in sick, customers cancel appointments, and your office staff has to juggle the workload.

Xora automates the scheduling process by allowing you to schedule appointments through the Xora Web portal and then send that information directly to the phones of your mobile team. Workers can start their days at the job site instead of the office - saving you time and mileage - and if a customer cancels or a worker is running late, you can respond quickly and efficiently.

Why wait? Give Xora GPS TimeTrack a try!

Pricing starts at less than \$1 per day per mobile worker.
