

GPS TimeTrack for Distribution

Track. Manage. Optimize.

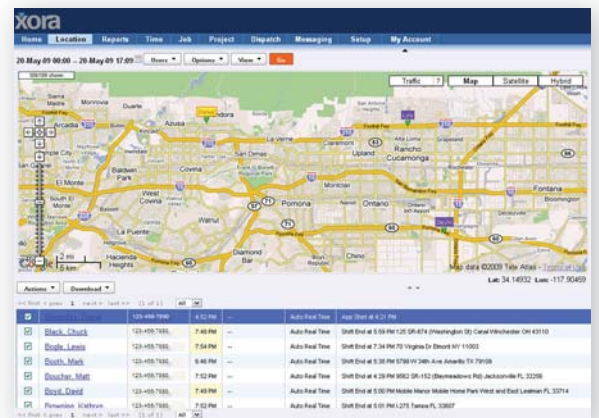

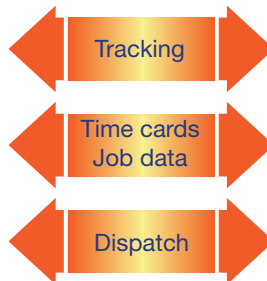

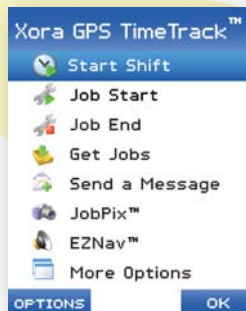

Managing a team that is always on the move can be a real challenge. Do you know how long drivers spent behind the wheel this week? How do you know that their mileage and payroll records are accurate? When schedule adjustments need to be made, how do you accommodate your customers so you don't lose out on potential business?

GPS TimeTrack is a robust software application that makes it easy for you to track, manage and optimize your fleet. Installed on GPS-enabled mobile devices, it allows managers to monitor drivers, automate data collection for their stops, and dispatch them efficiently. This leads to more visibility into the activities of your fleet, allowing you to reduce costs, increase productivity, and provide better service to your customers.

With Xora GPS TimeTrack, your business will:

- Gain visibility into the locations and activities of your drivers
 - View real-time maps of where drivers are
 - Know which stops drivers made and how long stop took
 - Enforce driver accountability
- Reduce labor, fuel and overtime costs
 - Validate mileage reported for reimbursement
 - Monitor hours worked for each driver in real time
 - Turn your drivers' phones into location-aware time clocks
- Increase the productivity of drivers and office staff
 - Reduce the amount of paperwork to be processed by office staff
 - Collect stop information through mobile forms
 - Make better routing decisions
- Differentiate your service from your competitors
 - Provide better customer service
 - Process payments faster
 - Know when drivers are running late or need assistance

How TimeTrack works

Drivers carry GPS-enabled mobile phones or have vehicle-installed devices. Drivers can enter time card and job data directly into their handsets.

Managers view drivers' locations, time card information and job data on a secure Web portal. Job instructions and messages can be pushed back to drivers from the portal.

Xora makes it easy.

Gain visibility. Reduce costs. Increase productivity. With a real-time view into where your drivers are and how they are spending their time, you can be more proactive in managing your fleet and responding to customers. Collecting time card data and exchanging stop information is seamless, with no paperwork to collect or reenter into your back-end system. Your fleet will be more efficient and get more done each day.

▼ Gain visibility

Streamline communication

Constantly calling or paging drivers to find out where they are is time-consuming and inefficient.

Xora uses GPS information gathered from your drivers' mobile phones to provide accurate location information for your fleet. In just a few mouse clicks, you know where your drivers are - in real time - by viewing their locations on the Xora Web portal.

Provide proof of service

Paperwork can get lost, arrive unreadable, or simply be inaccurate.

With error-free data capture, you can be sure that your drivers are compliant at each and every stop, delivering the best possible service. GPS records provide real-time date, time, and location information for your fleet so you are never out of sync.

▼ Reduce costs

Control mileage costs

Speeding, driving out of route, or getting lost can burn excess fuel that ends up costing your company a bundle in reimbursement.

Xora helps you monitor the location and speed of your drivers, ensuring that they are where they are supposed to be. If a driver speeds, gets delayed at a stop, or travels out of route, you can be notified immediately, allowing you to manage your fleet proactively and control costs at the same time.

Manage overtime costs

Do you know how close your drivers are to overtime right now? Overtime costs add up quickly, seriously impacting your bottom line.

With Xora, your drivers' mobile phones become virtual time clocks, allowing you to keep track - in real time - of how many hours each driver works each week. You can even create alerts that notify you when a driver reaches a certain number of hours, so there are no surprises when you receive time sheets.

▼ Increase productivity

Increase dispatch efficiency

Your drivers have a lot of stops to make, but are they spending the right amount of time at each stop? Are they using the best routes to get from stop to stop?

Xora allows you to load your team's schedule into the Xora system and then map the best route for the day's stops. From the Web portal, you can view the routes that your drivers took throughout the day and how long they spent at each stop.

Automate scheduling

Schedules are never set in stone. Drivers call in sick, customers cancel appointments, and your office staff has to juggle the workload.

Xora automates the scheduling process by allowing you to schedule appointments through the Xora Web portal and then send that information directly to the phones of your fleet. If a customer cancels or a driver is running late, you can respond quickly and efficiently.

Why wait? Give Xora GPS TimeTrack a try!

Pricing starts at less than \$1 per day per mobile worker.
