

Xora GPS TimeTrack Now Available for the iPhone!

Xora is excited to announce that Xora GPS TimeTrack now supports the iPhone! Xora turns any mobile device into a powerful productivity tool. Now, Xora's intuitive mobile app is available for the most popular smartphone on the market, providing a comprehensive, enterprise-ready solution for iPhone users.

Xora GPS TimeTrack on the iPhone.

Availability

The Xora mobile app for iPhone is available exclusively for customers using the Xora GPS TimeTrack T2 version, which includes most accounts deployed after June 6, 2011. The application is not compatible with the T1 version, used by customers who signed up before June 2011.

Compatibility

Compatible devices include iPhone 3G, 3GS, 4, and iPad. GPS TimeTrack requires iOS 4.x.

How to get it

Xora sales representatives are available to help you with your order. Just call 877-477-9672 and press 2 for Sales.

Mobile App Details

The Xora mobile app for iPhone features the same powerful functionality previously available only to Android users. Redesigned icons and intuitive workflow make it even easier for mobile employees to use Xora to streamline data collection and communication with managers. And, you'll love the user-friendly interface.

With the Xora GPS TimeTrack mobile app, your mobile employees can:

- » Click to start/stop time for shifts, breaks and jobs; supervisors can clock in their staff
- » Communicate receipt, acceptance and status of job assignments from the office
- » Receive messages from dispatch or operations staff as needed
- » Use mobile forms to capture job-specific data, like inventory used, patient information, or proof of delivery
- » Take photos, get electronic signatures, or scan barcodes to provide full job documentation
